Major Incidents reported during the day

August 20, 2023

- 1) Samanalawewa full load generation restricted, in order to comply with the operation constraints initiated by propagation of air bubbles at reservoir intake, which would further course for the possible formation of vortex at the same place, due to the severe depletion of Samanalawewa reservoir storage.
- 2) Habarana - New Anuradhapura 132kV cct tripped from both ends at 13:43hrs due to the operation of distance protection. The cct was normalized at 14:10hrs.
- 3) Thuhiriya Feeder 07 tripped at 18:27hrs due to the operation of O/C and E/F protection. Consequently, Thuhiriya 33kV B/S CB, 132/33kV T/F 01 and T/F 03 tripped from both sides due to the operation of O/C protection. This caused 33kV B/S 01 to be dead along with feeders 01, 03, 05, 09 and 11. Both T/Fs and all affected feeders except feeder 07 were restored by 19:24 hrs.
